

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

During their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could quickly and safely elevate individuals in the air to accomplish upkeep and other building services.

After their return from holiday, John set up a partnership with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current designs.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of marketplaces worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer environment.
